**LineKotsi Stylized HDRI pack**

Hi, my name is Liya! **Thank you** very much for purchasing my asset.
I hope you enjoy using that amazing stylized skies .

I have plans to expand that pack by adding few new skies every month.
So if you very like my pack , please **rate,** and leave in review your wish, with cloud you would like to see in next updates.

Manual

At folder Linekotsi>Cartoon & Stylized HDRI sky you can find HDRI images that already setted as Cube Texture.

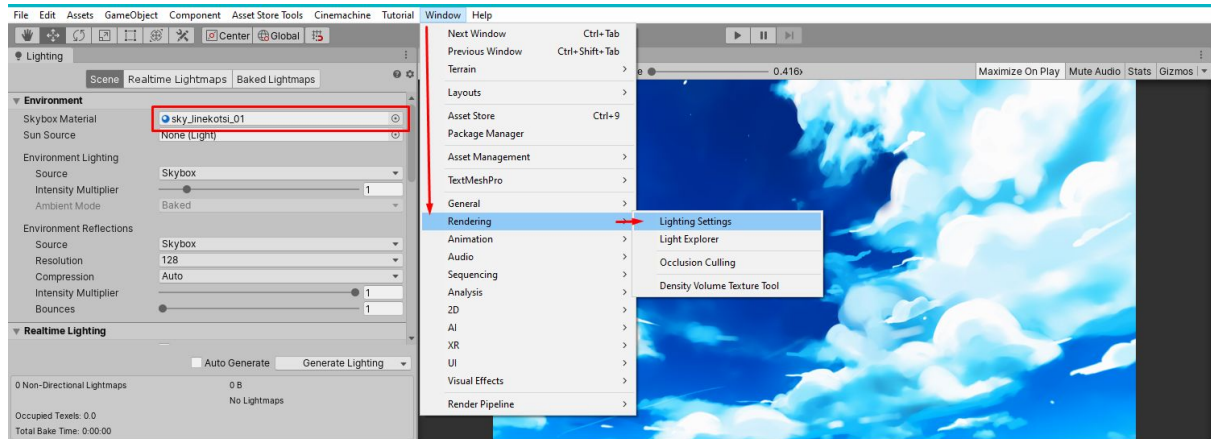

Recommended settings for HDRI sky.

By default Compression setted as None, for get best quality of clouds, but you can change it to High Quality or Low Quality to reduce application weight on hardware storage.

Each skybox has resolution 4096x2048 pixels.

Also if you want to use true HDRI sky, then use slybox from folder called **HDRI_Files** for get most realistic reflections and baking light result.

If you are using standard built-in render - then check folder LineKotsi\Cartoon & Stylized HDRI sky\Standart_Render_Pipeline_Materials , you can find here skybox material that you need to apply in lighting window.
